Students of Semester- VI BCA (TYBCA), FCAIT, GLS University have successfully completed the System Development Project Part-II, System Analysis work on “UseMart: Second hand goods and marketplace” as a partial fulfilment of the study of Third year Semester-VI Bachelor of Computer Applications (BCA).

Date of Submission:

Prof.Ruchika Rami
Project Guide

Dr. Tripti Dodiya
Dean, FCAIT UG

ACKNOWLEDGEMENT

We are thankful to all those persons who have directly or indirectly contributed to create this project and helped us lot to make it a great success. We would get great and useful experience that will change our career.

We grab this opportunity to introduce the project of “UseMart: 2nd hands Goods And MarketPlace” Web Application as a part of our 6th Semester BCA.

First, we would like to express our sincere gratitude to the Dean of the institute, **Dr.Tripti Dodiya**, and the Internal Guide **Prof.Ruchika Rami** for giving us great opportunity of Web Application Development. We also like to thank her for giving guidance and constant inspiration with the valuable suggestions during our project work.

We are extremely thankful to each faculty member of **GLSFCAIT**. As they share their valuable time with us for our project and solve our problem.

We are grateful to all the member of “UseMart: 2nd hands Goods And MarketPlace” Web Application for their kind support and suggestions during all the Analysis Stage.

Seventeen Software - Company Profile

Seventeen Software is a dynamic web development and digital solutions agency based in Ahmedabad, India. Established in 2024, the company aims to provide innovative, cost-effective solutions tailored to meet the diverse needs of its clients. Their core services include website and app development, UI/UX design, SEO, digital marketing, and content creation, allowing businesses to enhance their online presence effectively.

With a focus on user experience and efficient project management, Seventeen Software helps its clients achieve their digital goals. Their experienced team uses a collaborative approach to craft customized solutions that address both technical requirements and creative aspirations. The agency's mission is to drive business growth by implementing strategies that improve engagement and functionality.

In addition to technical expertise, Seventeen Software places great emphasis on delivering value to its clients through exceptional customer service and support. They work closely with businesses to understand their vision, ensuring that each project is delivered on time and aligns with the client's brand identity. Seventeen Software's commitment to quality has positioned them as a trusted partner for companies seeking impactful digital transformations.

PROJECT PROFILE

Title: - USEMART: Second hand goods and marketplace

UseMart is an innovative e-commerce platform dedicated to the buying and selling of second-hand goods. The platform aims to promote sustainability by reducing waste and encouraging the reuse of items. It provides a secure, userfriendly environment for individuals to find high-quality preowned products, ranging from electronics and clothing to furniture and books. UseMart's comprehensive features ensure a seamless and trustworthy experience for both buyers and sellers

Objective: -

- Promote sustainability by facilitating the reuse of secondhand items.
- Provide a secure and user-friendly platform for buying and selling preowned goods.
- Build trust within the community through robust verification and review systems.
- Enhance user engagement with interactive features and community forums

Project Technology:

- **Front End:** HTML, CSS, & JavaScript
- **Back End:** Python & PHP
- **Database:** MySQL
- **Server:** Apache.
- **Software Used:** Figma, Draw.io, VsCode, XAMPP.

System Requirement:

- **Processor:** Intel core i3
- **SSD:** 256GB
- **RAM:** 4GB
- **CPU:** 1.2Ghz

Admin :

- **User Management** – Add, remove, or verify users.
- **Product Moderation** – Approve, reject, or remove listed products.
- **Category & Listing Control** – Manage product categories and organize listings.
- **Transaction Monitoring** – Oversee payments and refund processes.
- **Security & Fraud Prevention** – Detect and prevent fraudulent activities.
- **Reports & Analytics** – Track user activity, sales, and performance metrics.
- **Community Management** – Oversee forum discussions and user interactions.

User-1(Buyer):

- **Browse & Search** – Explore a wide range of second-hand products using search and filter options.
- **View Product Details** – Check product descriptions, images, price, condition, and seller details.
- **Add to Wishlist** – Save favorite items for future reference.
- **Chat with Seller** – Contact sellers directly through the inbuilt chat feature to negotiate prices or ask questions.
- **Place Orders** – Purchase items securely using the integrated payment gateway.

User-2(Seller):

- **Create & Manage Listings** – Upload product details, images, pricing, and condition.
- **Edit & Update Listings** – Modify product descriptions, prices, and availability as needed.
- **Chat with Buyers** – Communicate directly with potential buyers to answer queries and negotiate deals.
- **Manage Orders** – Accept, process, and track buyer orders.
- **Receive Payments Securely** – Get payments through the integrated secure payment gateway.
- **Promote Listings** – Boost visibility of products through featured listings or promotions.
- **Report & Resolve Issues** – Address disputes, report fraudulent buyers, or raise support requests.
- **Join Community Forums** – Engage with other sellers, share tips, and discuss marketplace trends.

EXISTING SYSTEM

- Currently company don't have any existing system.
- Company is doing work manually.

LIMITATION OF EXISTING SYSTEM

- It requires a tremendous level of organization.
- complexity to maintain the records.

PROPOSED SYSTEM

- **User Management** – Secure registration, profile creation, and verification for buyers and sellers.
- **Product Listings & Search** – Sellers can list items; buyers can browse, search, and filter products.
- **Secure Transactions** – Integrated payment gateway supporting multiple payment methods.
- **Chat & Communication** – Direct messaging between buyers and sellers for negotiations.
- **Community Forums** – Users can engage in discussions, share insights, and seek recommendations.

Project Modules

- User Profiles
- Search and Filter
- Payment
- Verification System
- Chat Feature
- Wish list
- Community Forums
- Add to Cart

User Profiles

Description:

Allow users to create and manage profiles, list items for sale, purchases history, and manage listings

Implementation:

- Profile Creation and Management: Users can register, log in, edit profiles, and manage privacy settings.
- Listings Management: Users can add, edit, or delete their sale items.
- Purchase History: Users can view their purchase history

Search and Filter

Description:

Implement advanced search and filter options to help users find specific items quickly.

Implementation:

- Search Functionality: Develop a robust search algorithm.
- Filter Options: Include filters like category, price range, location, condition, and seller ratings.
- Sorting Options: Allow sorting by relevance, price, newest listings, and ratings

Verification System

Description:

Develop a system to verify the quality and authenticity of listed items, reducing the risk of fraud.

Implementation:

- Item Verification: Implement methods for sellers to provide proof of authenticity.
- User Verification: Use email or phone verification and possibly document verification.
- Reporting and Moderation: Allow users to report suspicious listings, and have moderators review and act on these reports.

Reviews and Ratings

Description:

Enable users to leave reviews and ratings for sellers and products, building trust within the community

Implementation:

- Review System: Users can rate transactions and leave detailed reviews.
- Moderation: Implement tools to monitor and moderate reviews to prevent abuse.
- Feedback Loop: Allow sellers to respond to reviews to maintain transparency

Chat Feature

Description:

Include a chat function for buyers and sellers to communicate directly, ask questions, and negotiate prices.

Implementation:

- Real-Time Chat: Use WebSocket or third-party services (e.g., Twilio, Firebase) for instant messaging.
- Message History: Store chat history for reference.
- Notifications: Notify users of new messages and updates

Wish List

Description:

Allow users to create wish list of items they are interested in and receive notifications when items become available.

Implementation:

- Wish list Creation: Users can add items to their wish list.
- Notifications: Notify users when wish list items are available or on sale.
- Wish list Management: Allow users to organize and manage their wish list

Community Forums

Description:

Provide forums for users to discuss sustainable living, share tips, and engage with each other to find or search required item.

Implementation:

- Forum Structure: Create categories and threads for different topics.
- Chatbox Feature: Include a chatbox for real-time discussions.
- Moderation Tools: Ensure active moderation to maintain a positive community environment.
- Add to Cart from Forums: Allow users to add items directly to their cart from forum discussions if relevant.

Add to Cart

Description:

Allow users to add items to a virtual shopping cart for future purchase.

Implementation:

- **Cart Functionality:** Users can add, remove, and update items in their cart.
- **Persistent Cart:** Ensure the cart is saved even if the user logs out and returns later.
- **Checkout Integration:** Integrate the cart with the order management system for a seamless purchase process

Pros and cons of project USEMART

Pros:

- **Sustainability:** Promotes eco-friendly practices by encouraging product reuse.
- **Cost-Effective:** Offers affordable second-hand goods for buyers and extra income for sellers.
- **User-Friendly:** Simple navigation, search filters, and useful features like chat and wish lists.
- **Secure Transactions:** Verification and payment systems ensure trust and safety.
- **Community Engagement:** Forums and reviews enhance social interaction and trust.
- **Diverse Products:** Broad range of categories appeals to many users.

Cons:

- **Trust Issues:** Users may be wary of second-hand product quality.
- **Logistics:** Complexities in managing deliveries and returns.
- **Competition:** Faces tough competition from established platforms.
- **Scalability:** Growth could strain resources and require infrastructure scaling.
- **Fraud Risk:** Vulnerable to scams, requiring constant monitoring.

UML Diagrams

- Use-case diagram
- Class diagram
- Activity diagram
- State-chart diagrams
- Sequences diagrams
- Data dictionary

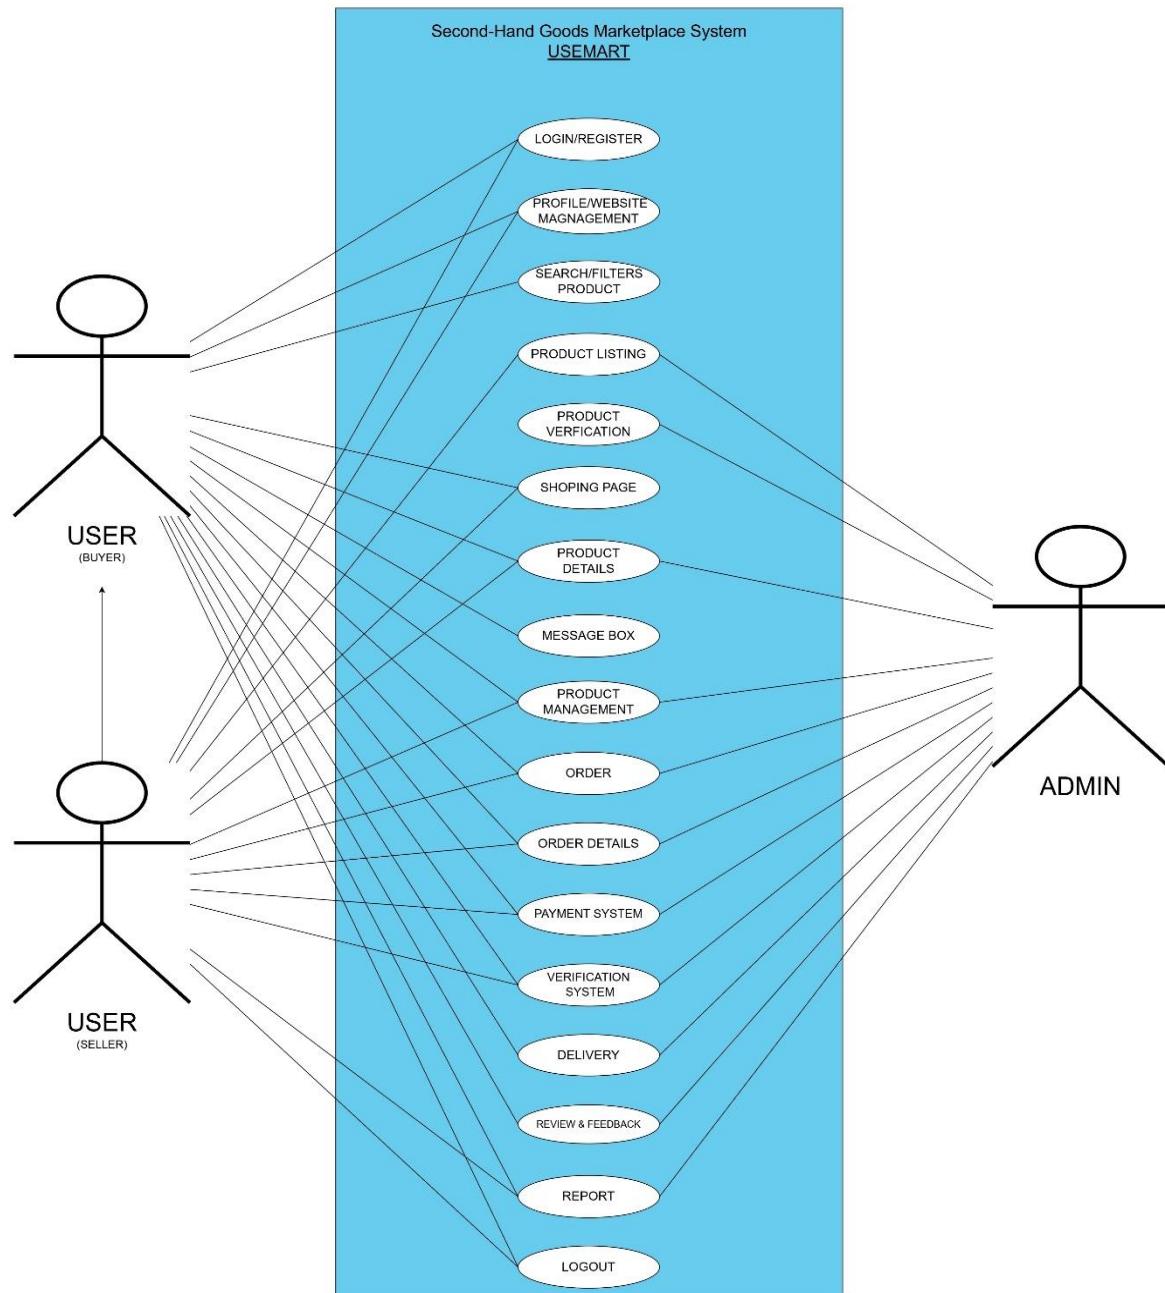

1. Use Case Diagram:

The **Use Case Diagram** for **UseMart** presents an overview of interactions between users (both buyers and sellers), admin, and the system functionalities. Here's a detailed breakdown:

Key Use Cases:

- **Login/Register:** Buyers, sellers, and admin log in or register to access the system.
- **Profile/Website Management:** Users manage their profiles; admin oversees website settings.
- **Search/Filters Product:** Buyers search for products with filters.
- **Product Listing/Management:** Sellers list and manage their products; admin verifies listings.
- **Product Verification:** Admin ensures product quality before they go live.
- **Shopping Page/Product Details:** Buyers view products and detailed information.
- **Message Box:** Enables communication between buyers and sellers.
- **Order/Order Details:** Buyers place orders; sellers view and fulfil them.
- **Payment System:** Handles secure transactions between buyers and sellers.
- **Verification System:** Admin verifies users to ensure trustworthiness.
- **Delivery:** Sellers arrange shipping; buyers track orders.
- **Review/Feedback:** Buyers leave ratings; sellers respond.
- **Report:** Users can report issues; admin resolves disputes.
- **Logout:** Secure logout for all users.

USE CASE DIAGRAM

2. Class Diagram

Admin: -Purpose: Manages the overall operation of the e-commerce platform. This includes user management, product approvals, and system monitoring for security and compliance.

Buyer: -Purpose: Represents the end-user of the platform who browses products, adds items to the cart, places orders, and leaves reviews.

Seller: -Purpose: Represents individuals or businesses offering products in the marketplace. This module manages seller registration, product listings, and performance metrics like ratings.

Order: -Purpose: Manages the entire lifecycle of a customer order, including creation, status updates, and cancellation. It tracks the products purchased, total amount, and order history.

Product: -Purpose: Represents the items available for sale in the marketplace. This module handles product information, including details like name, description, pricing, and availability.

Cart: -Purpose: Provides a temporary storage area for products that buyers intend to purchase. It allows users to add or remove items before completing the order.

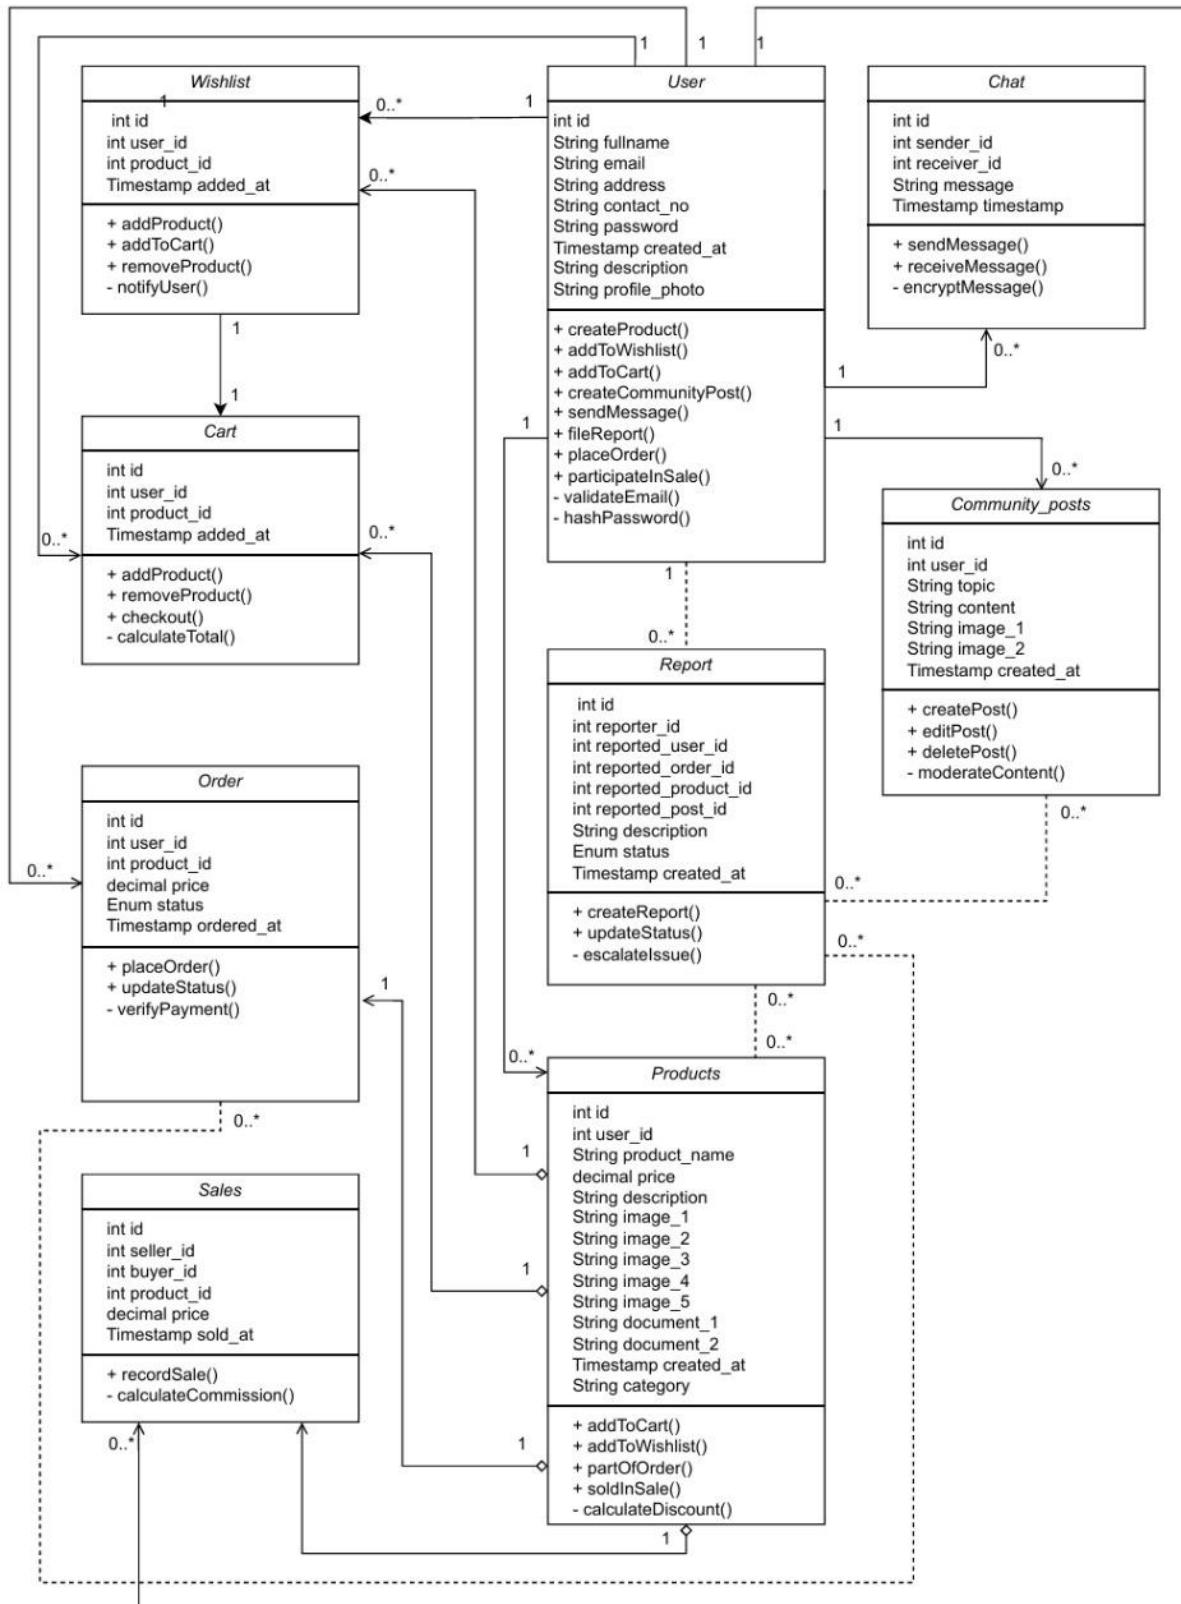

Payment: -Purpose: Handles all financial transactions related to orders. This includes processing payments, managing refunds, and storing payment information securely.

Review: -Purpose: Allows buyers to provide feedback on products they've purchased. This module enables rating and commenting, helping future buyers make informed decisions.

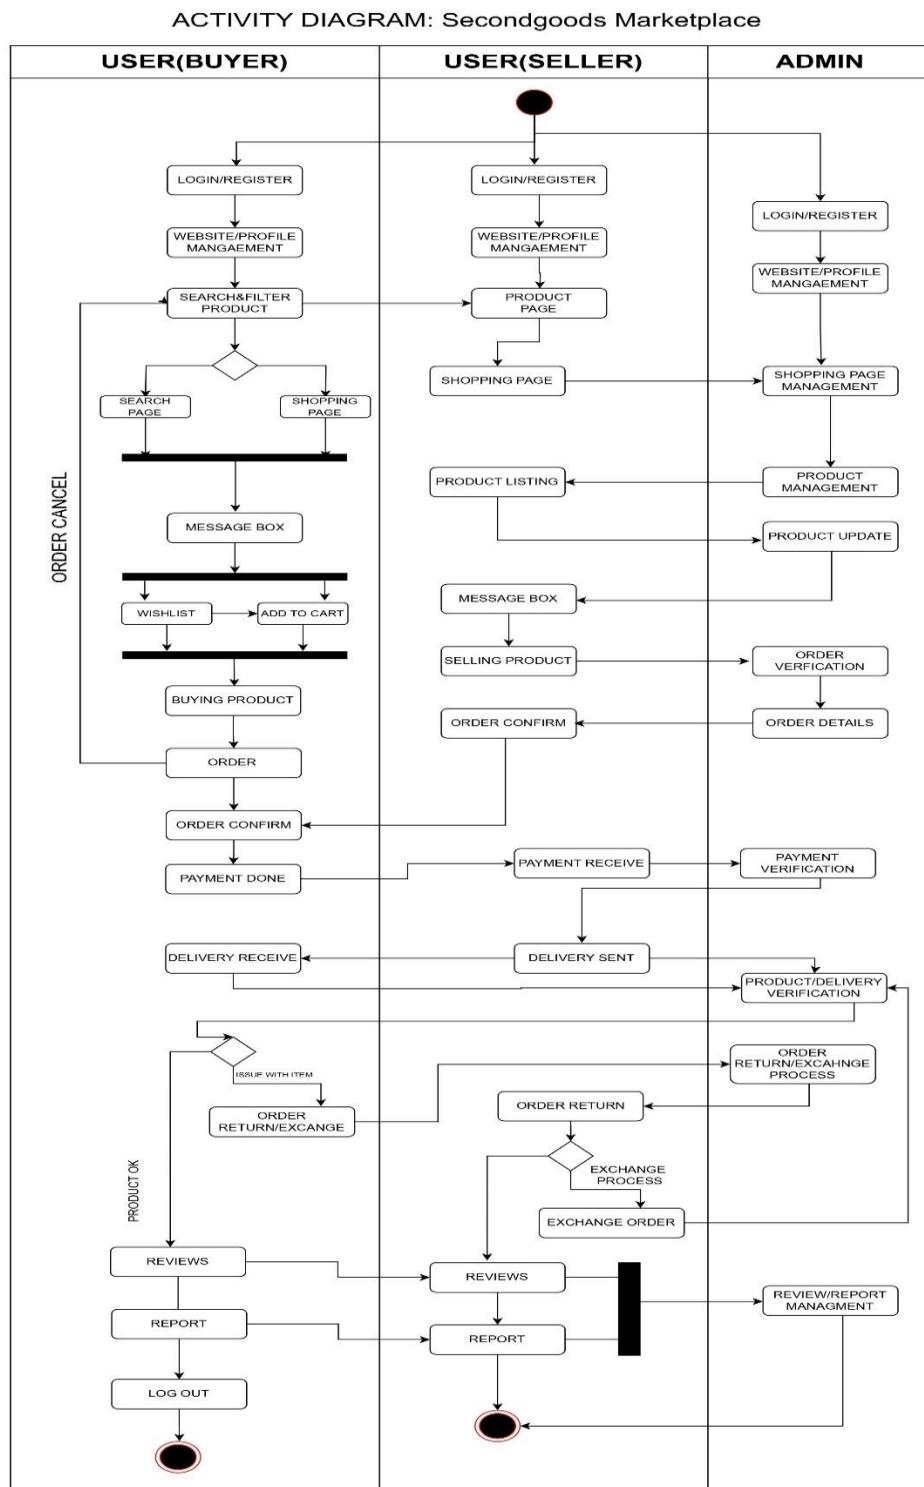

Message Box: -Purpose: Facilitates communication between buyers and sellers. This module allows users to send and receive messages related to inquiries, order updates, and support.

Class Diagram

UseMart: - Second Hands Goods and Marketplace

3. Activity Diagram: -The Activity Diagram shows the dynamic aspect of the system. It is basically a flowchart to represent the flow from one activity to another activity.

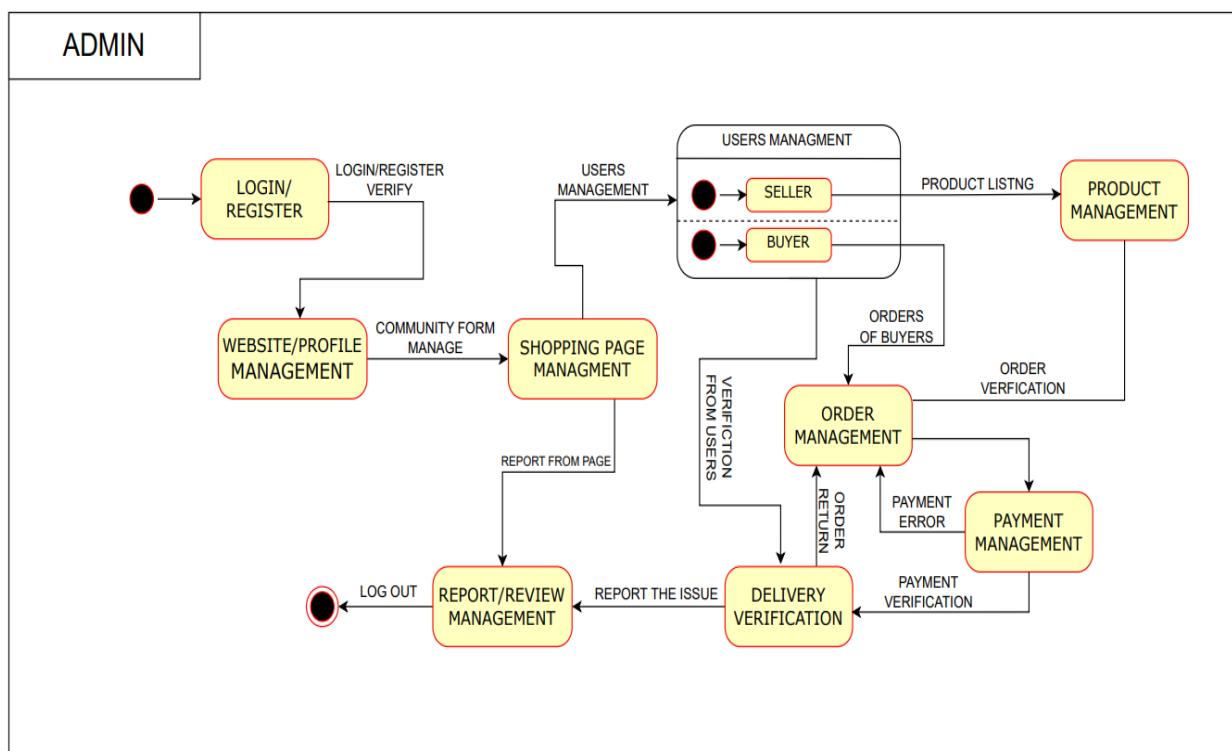

4. State chart: -

A state chart diagram (also known as a state machine diagram) is a type of behavioural diagram in Unified Modelling Language (UML) that represents the states of an object and the transitions between those states. It is particularly useful for modelling the dynamic behaviour of a system, especially for objects that exhibit different states throughout their lifecycle.

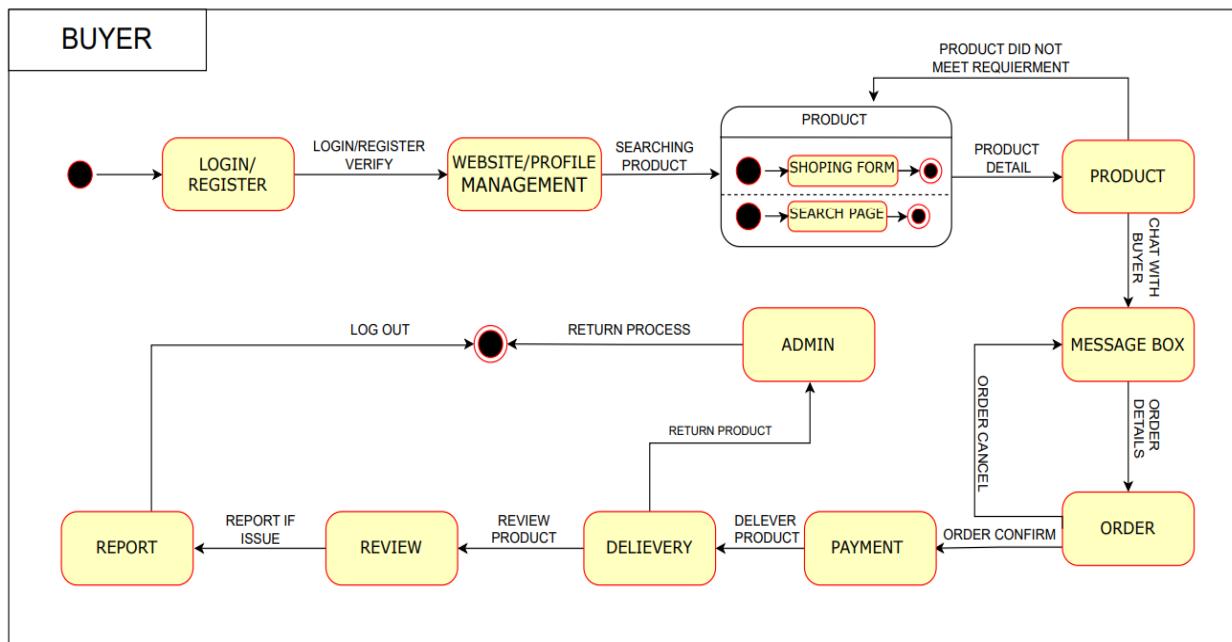

State-chart:

- Admin
- Buyer
- Seller
- Order
- Product
- Add to cart
- Payment

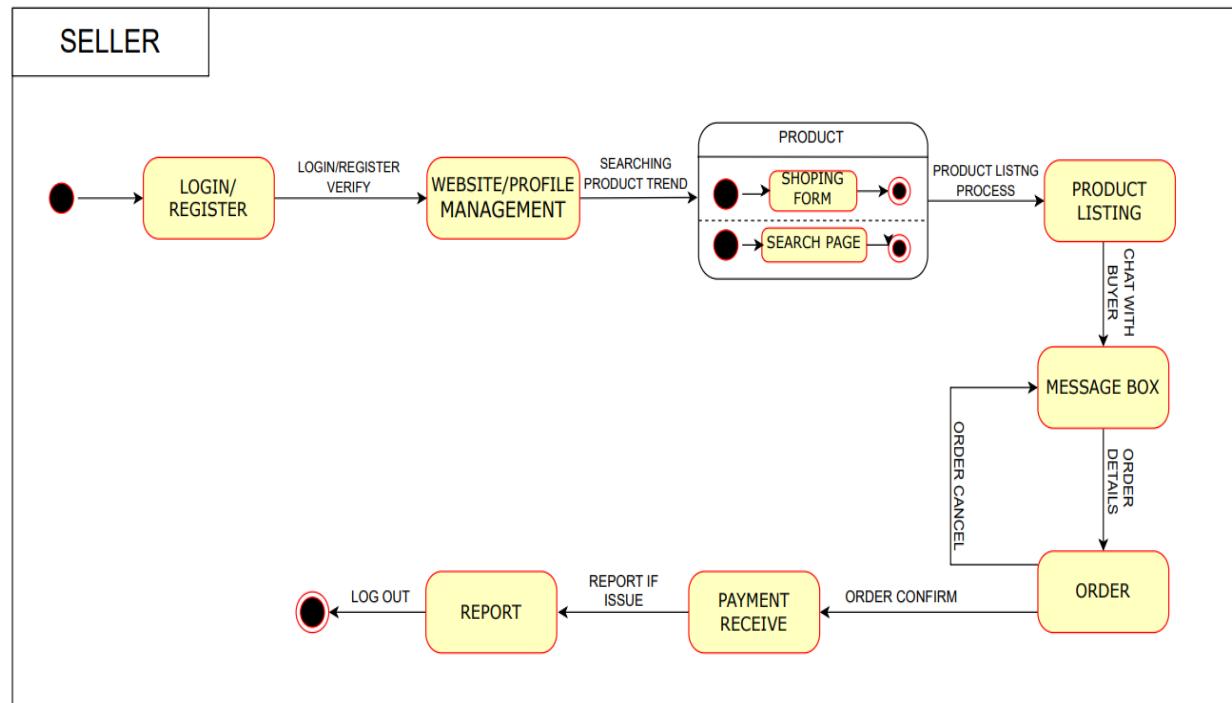

1.Admin: -

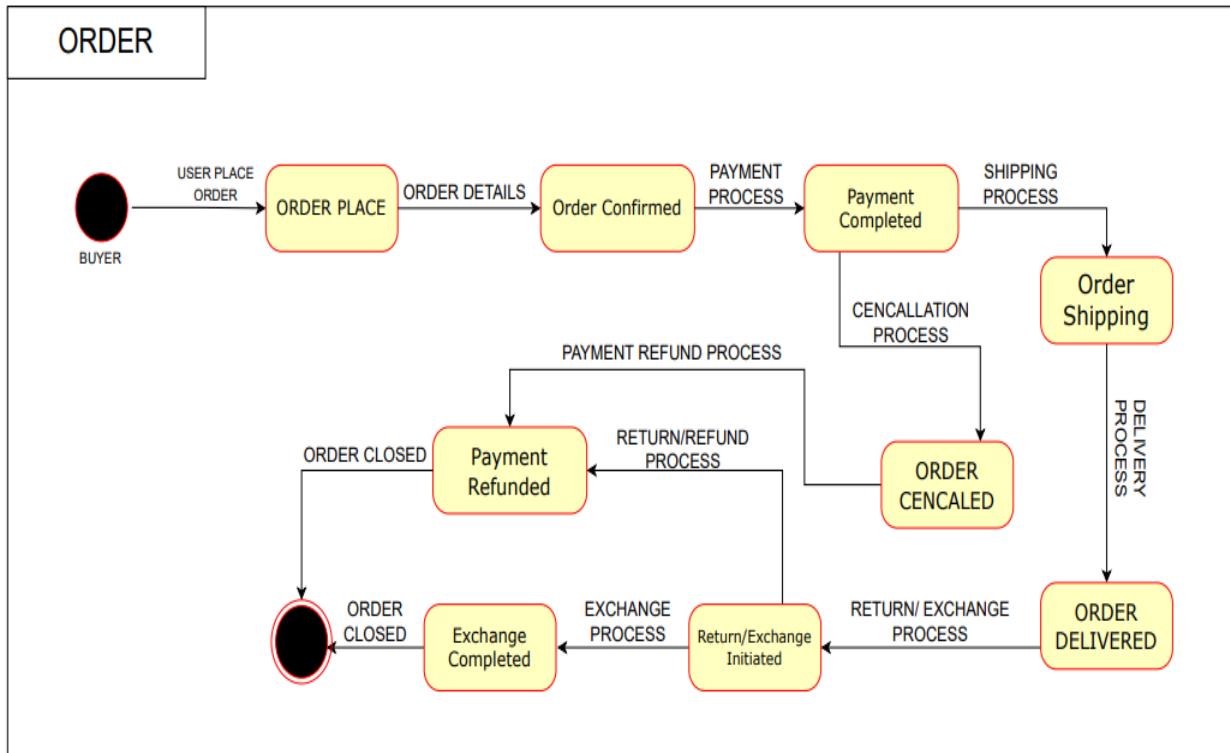

2.Buyer

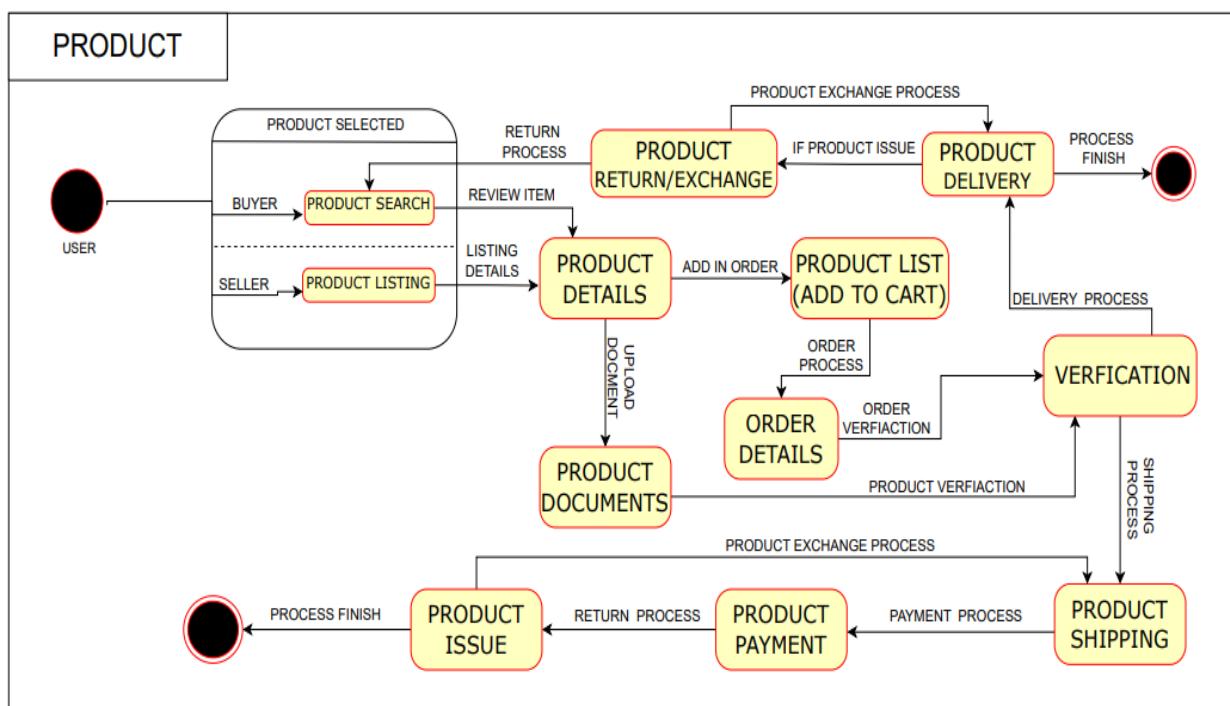

3.Seller

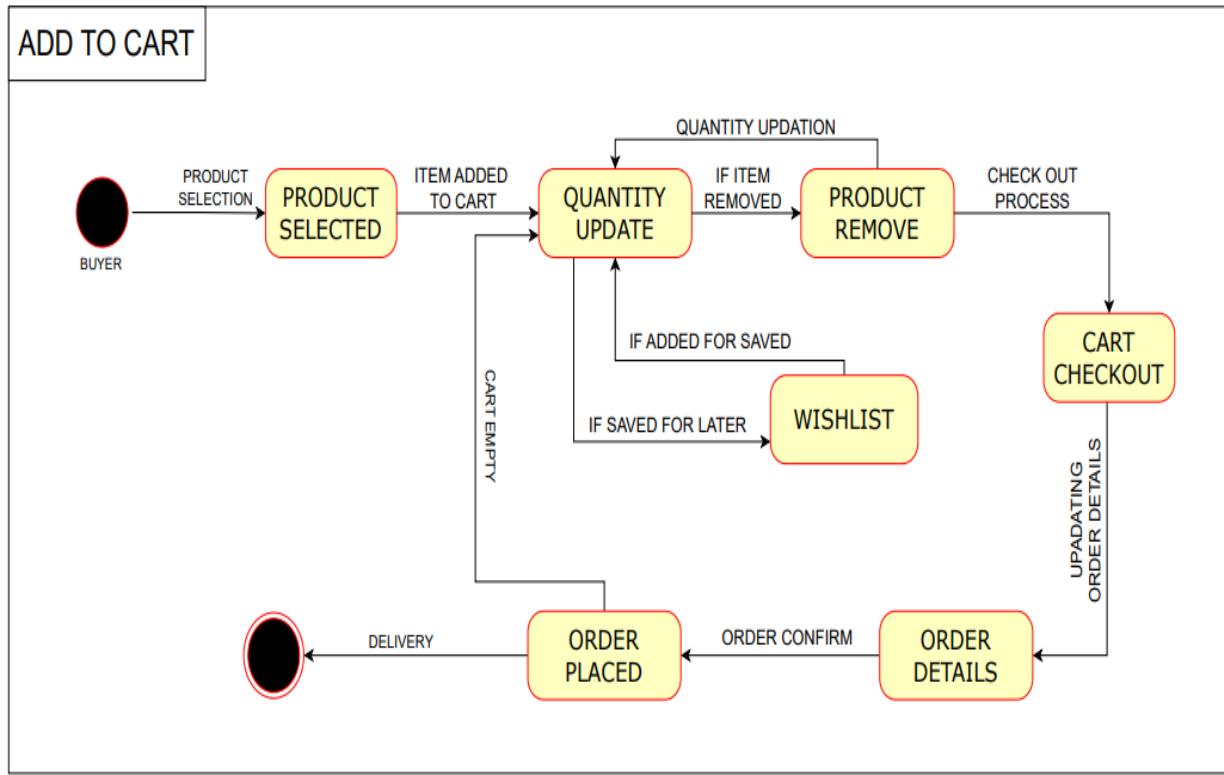

4.Order

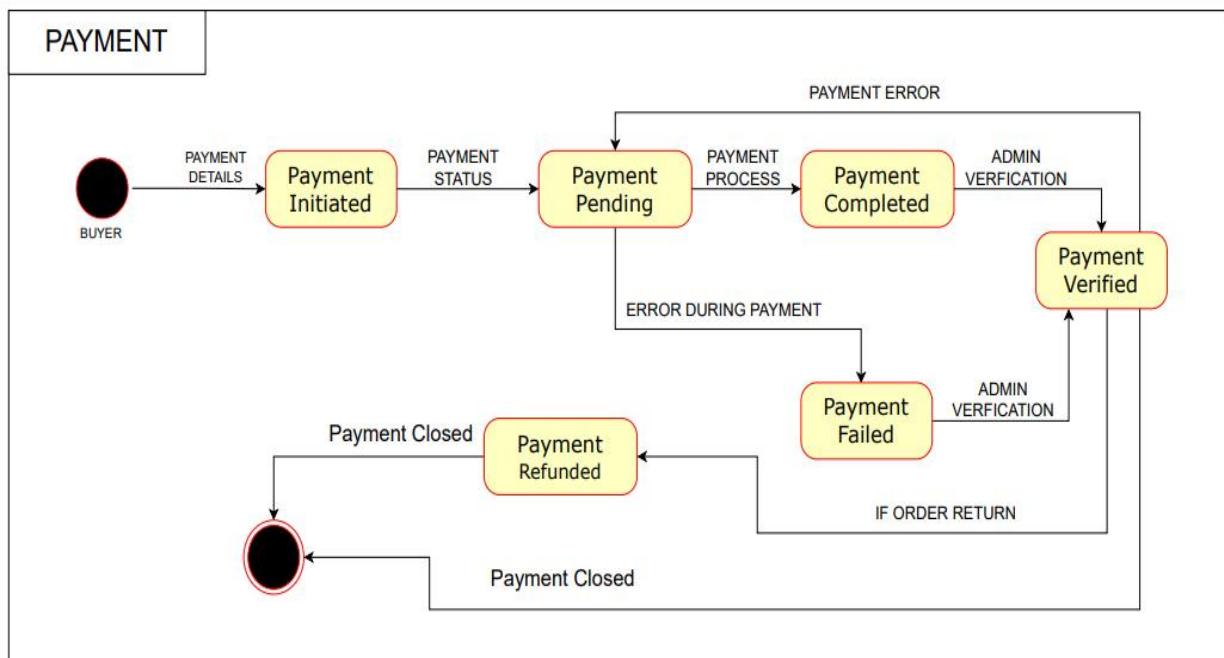

5.Product

6.Add to Cart

7.Payment

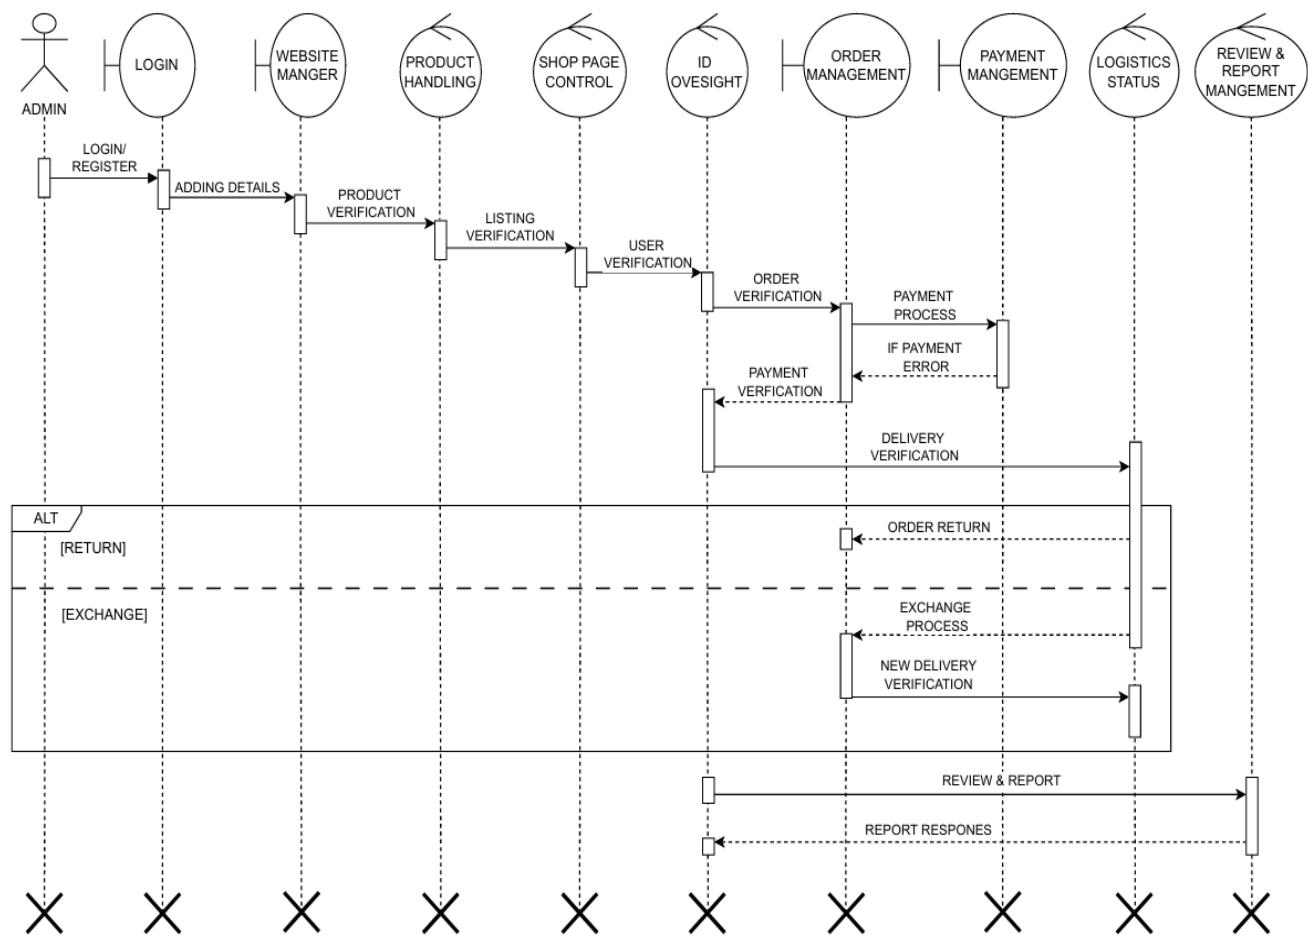

5. Sequence Diagram: -

A sequence diagram is a type of interaction diagram in UML (Unified Modelling Language) that shows how objects interact in a particular scenario of a use case. It emphasizes the order of messages exchanged between objects, detailing the flow of control and data.

Data dictionary

Users: - Stores user account details.

Column	Data Type	Constraints	Description
id	INT (AUTO_INCREMENT)	PRIMARY KEY	Unique user identifier
fullname	VARCHAR(255)	NOT NULL	Full name of the user
email	VARCHAR(255)	UNIQUE, NOT NULL	User's email address
address	VARCHAR(255)	NULL	User's address
contact_no	VARCHAR(20)	NULL	User's contact number
password	VARCHAR(255)	NOT NULL	Encrypted user password
created_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Account creation timestamp
description	TEXT	NULL	User's bio or profile description
profile_photo	VARCHAR(255)	NULL	URL of user's profile photo

Products: -Stores details of products listed for sale.

Column	Data Type	Constraints	Description
id	INT (AUTO_INCREMENT)	PRIMARY KEY	Unique product identifier
user_id	INT	NOT NULL, FOREIGN KEY (users.id)	ID of the seller
product_name	VARCHAR(255)	NOT NULL	Name of the product
price	DECIMAL(10,2)	NOT NULL	Product price
description	TEXT	NULL	Product description
image_1 to image_5	VARCHAR(255)	NULL	URLs for up to 5 images
document_1, document_2	VARCHAR(255)	NULL	URLs for attached documents
created_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Timestamp when product was listed
category	VARCHAR(255)	NOT NULL	Product category

Wishlist: - Stores products added to a user's wishlist.

Column	Data Type	Constraints	Description
id	INT (AUTO_INCREMENT)	PRIMARY KEY	Unique wishlist entry ID
user_id	INT	NOT NULL, FOREIGN KEY (users.id)	User who added the product
product_id	INT	NOT NULL, FOREIGN KEY (products.id)	Product added to wishlist
added_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Timestamp when added

Cart: -Stores products added to a user's cart.

Column	Data Type	Constraints	Description
id	INT (AUTO_INCREMENT)	PRIMARY KEY	Unique cart entry ID
user_id	INT	NOT NULL, FOREIGN KEY (users.id)	User who added the product
product_id	INT	NOT NULL, FOREIGN KEY (products.id)	Product added to cart
added_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Timestamp when added

community_posts: -Stores user-generated posts in the community forum.

Column	Data Type	Constraints	Description
id	INT (AUTO_INCREMENT)	PRIMARY KEY	Unique post identifier
user_id	INT	NOT NULL, FOREIGN KEY (users.id)	User who created the post
topic	VARCHAR(255)	NOT NULL	Post topic/title
content	TEXT	NOT NULL, CHECK (CHAR_LENGTH(content) <= 3000)	Post content (max 3000 chars)
image_1, image_2	VARCHAR(255)	NULL	Image URLs for the post
created_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Timestamp when post was created

Chats: -Stores chat messages between users.

Column	Data Type	Constraints	Description
id	INT (AUTO_INCREMENT)	PRIMARY KEY	Unique message identifier
sender_id	INT	NOT NULL, FOREIGN KEY (users.id)	ID of the sender
receiver_id	INT	NOT NULL, FOREIGN KEY (users.id)	ID of the receiver
message	TEXT	NOT NULL	Chat message content
timestamp	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Timestamp when message was sent

Reports: -Stores reports filed by users regarding issues.

Column	Data Type	Constraints	Description
id	INT (AUTO_INCREMENT)	PRIMARY KEY	Unique report ID
reporter_id	INT	NOT NULL, FOREIGN KEY (users.id)	User filing the report
reported_user_id	INT	NULL, FOREIGN KEY (users.id)	Reported user
reported_order_id	INT	NULL, FOREIGN KEY (orders.id)	Reported order
reported_product_id	INT	NULL, FOREIGN KEY (products.id)	Reported product
reported_post_id	INT	NULL, FOREIGN KEY (community_posts.id)	Reported post
description	TEXT	NOT NULL	Details of the report
status	ENUM('pending', 'reviewed', 'resolved')	DEFAULT 'pending'	Report status
created_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	creation timestamp

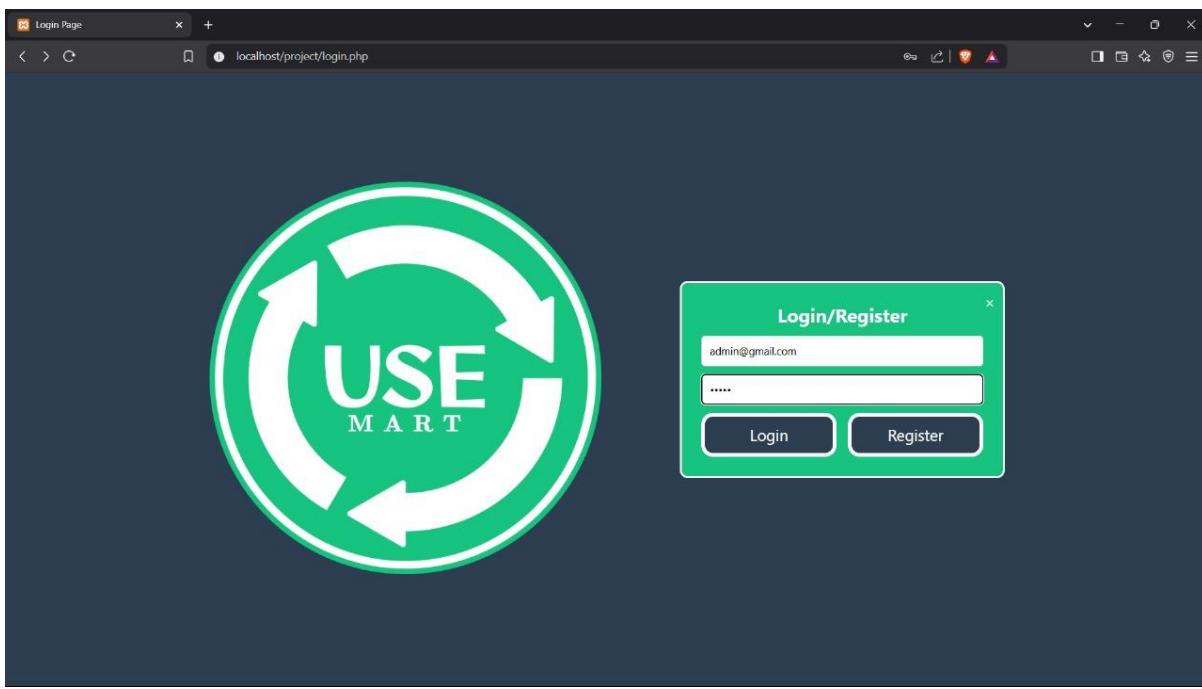

Orders: - Stores purchase order details.

Column	Data Type	Constraints	Description
id	INT (AUTO_INCREMENT)	PRIMARY KEY	Unique order ID
user_id	INT	NOT NULL, FOREIGN KEY (users.id)	Buyer ID
product_id	INT	NOT NULL, FOREIGN KEY (products.id)	Purchased product
price	DECIMAL(10,2)	NOT NULL	Order price
status	ENUM('pending', 'shipped', 'delivered')	DEFAULT 'pending'	Order status
ordered_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Timestamp when order was placed

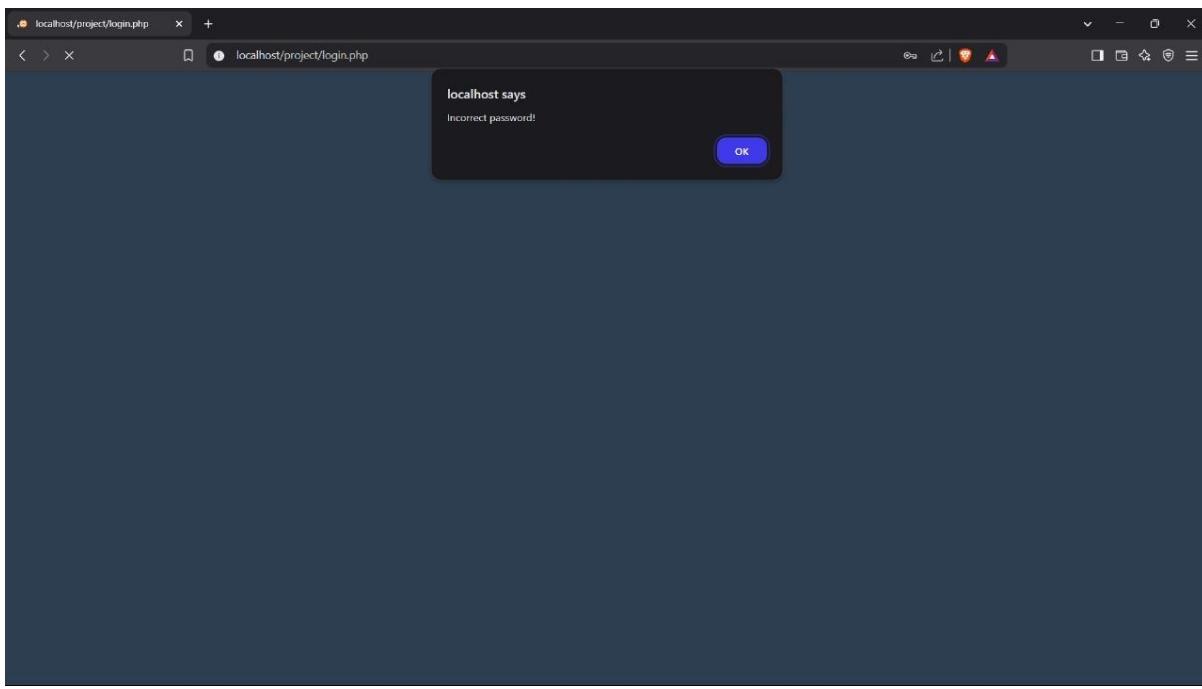

Sales: -Stores completed sales transactions.

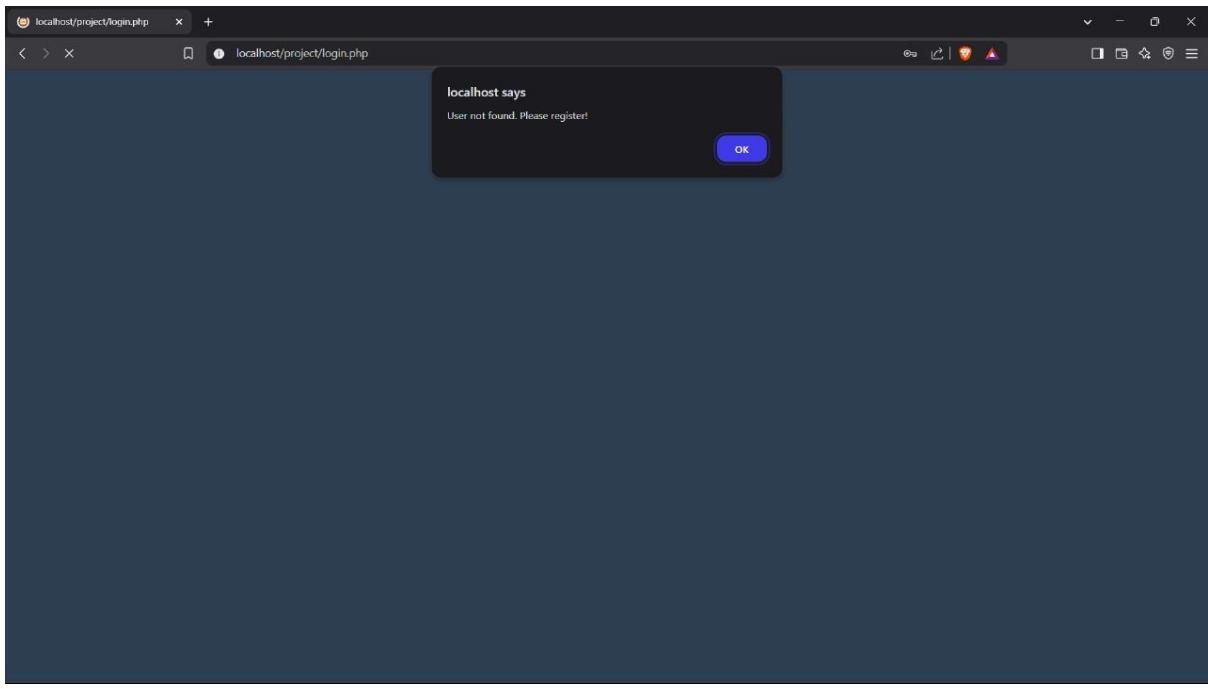

Column	Data Type	Constraints	Description
id	INT (AUTO_INCREMENT)	PRIMARY KEY	Unique sale
seller_id	INT	NOT NULL, FOREIGN KEY (users.id)	Seller's user
buyer_id	INT	NOT NULL, FOREIGN KEY (users.id)	Buyer's user
product_id	INT	NOT NULL, FOREIGN KEY (products.id)	Product ID sold
price	DECIMAL(10,2)	NOT NULL	Final sale price
sold_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Timestamp when sale was completed

Admin panel

The screenshot shows a web browser window titled "Admin Report Panel" with the URL "localhost/project/admin_report.php". The main header is "Admin Dashboard" with a "Log Out" button. On the left, there's a sidebar with links: Reports, Orders Data, sells Data, Users Data, Products Data, Posts Data, Users cart Data, and Wishlist data. The main content area has a title "Reports Data" with tabs: ALL REPORTS, REPORTED ORDERS, REPORTED USERS, REPORTED POSTS, and REPORTED PRODUCTS. Under "Reported User", there's a card for a user named "Kushal mistry" with report details: Report: demo, Status: Pending, Name: Kushal mistry, Email: k@gmail.com, Address: India, Ahmedabad 380007, Mobile: 8160141513, and an Update Status dropdown set to Pending. A "Delete Report" button is in the top right of the card. Under "Reported Orders", there are two cards. The first card shows an order for COLORESSENCE Glitterati with ID 7, Product Name: COLORESSENCE Glitterati, Price: 600.00 Rs, Tracking Status: Shipped, Ordered At: 2025-03-09 19:53:41, and a status dropdown set to Pending. The second card shows an order for Tool Kit with ID 13, Product Name: Tool Kit, Price: 600.00 Rs, and a status dropdown set to Pending.

Admin can view all reports on admin dashboard and can download data through button on top left corner and also filter all the data according to is category [Users, Posts, Products and Orders].

Admin can change status of report [Pending, Reviewed, Resolved] to let user know about its status

Admin can delete a particular report if issue is resolved according to admin

The screenshot shows the Admin Report Panel interface. The main header is "Admin Dashboard". On the left sidebar, there are links for Reports, Orders Data, sells Data, Users Data, Products Data, Posts Data, Users cart Data, and Wishlist data. The main content area has a title "Reports Data" and tabs for ALL REPORTS, REPORTED ORDERS, REPORTED USERS, REPORTED POSTS, and REPORTED PRODUCTS. Under "Reported Products", there is a single entry for a product report. The product details are: Name of Product: Mamaearth Hydra-Glow Price: 500.00rs Category: Beauty products Status: Pending. The product description is: Full Coverage Dewy Finish Liquid Foundation With Vitamin C & Turmeric- 30 Ml|Full Coverage|Gives 3X Instant Glow|12-Hour Long Stay & Hydration|Spf 35|Non-Drying (04 Sun Glow) Visit the Mamaearth Store. The report reason is: demo. There are buttons for View Details, Pending (dropdown), and Delete Report. Below the product details are four small thumbnail images labeled Image 1, Image 2, Image 3, and Image 4.

The screenshot shows the Admin Report Panel interface. The main header is "Admin Dashboard". On the left sidebar, there are links for Reports, Orders Data, sells Data, Users Data, Products Data, Posts Data, Users cart Data, and Wishlist data. The main content area has a title "Reports Data" and tabs for ALL REPORTS, REPORTED ORDERS, REPORTED USERS, REPORTED POSTS, and REPORTED PRODUCTS. Under "Reported Posts", there are two entries. The first entry has the following details: Report Reason: fake, Status: Pending, Topic: Early listing, Content: product will listed in days for 20000rs text me now for buying this in low price, and Status: Pending (dropdown). It includes buttons for View Details, Pending (dropdown), and Delete Report, along with two image thumbnails. The second entry has the following details: Report Reason: demo, Status: Pending, Topic: wheel, Content: find me bike wheel 16x140, and Status: Pending (dropdown). It also includes buttons for View Details, Pending (dropdown), and Delete Report, along with two image thumbnails.

Admin can filter reports on admin dashboard. Admin can change status of report [Pending, Reviewed, Resolved] to let user know about its status. Admin can view all the images of product/post image by clicking on view detail(for product only) button and also delete a particular report if issue is resolved according to admin

The main area has tabs: ALL REPORTS, REPORTED ORDERS, REPORTED USERS, REPORTED POSTS, and REPORTED PRODUCTS. The REPORTED ORDERS tab is active. A modal window titled "localhost says" asks "Are you sure you want to delete this report?". Below the modal, there's a "Reported User" section with details: Report: demo, Status: Reviewed, Name: Kushal mistry, Email: l@gmail.com, Address: India, Ahmedabad 380007, Mobile: 8160141513, and Update Status: Reviewed. A "Delete Report" button is present. Another section for "Reported Orders" shows two items: Order ID: 7 Product Name: COLORESENCE Glitterati Price: 600.00 Rs, Tracking Status: Shipped, Ordered At: 2025-03-09 19:53:41, and Order ID: 13 Product Name: Tool Kit Price: 600.00 Rs, Report Reason: demo Report Status: Pending.

Warning before report deletion

This screenshot shows the same Admin Report Panel interface as the previous one. The "Reported User" section is identical. In the "Reported Orders" section, the second item (Order ID: 13) has been removed. The modal window now displays "Report deleted successfully!" with an "OK" button.

Report is deleted if press ok on alert

User panel

The screenshot displays the homepage of the UseMart platform. At the top, there's a navigation bar with links for 'Community', 'Chat', 'Wishlist', 'Cart', and user profile icons. Below the header is a large banner featuring a person working at a desk with a laptop and a box, with the text: 'UseMart is an innovative platform dedicated to the buying and selling of second-hand goods.' Below the banner are eight category icons: Electronics, Furniture, Clothes, Books, Toys, Tools, Vehicle parts, and Beauty. A section titled 'Products You May Like' shows five product cards: 'Valiant Women Price: 1000.00rs BUY NOW', 'Apple MacBook Air Laptop Price: 19000.00rs BUY NOW', 'Microsoft New Surface Laptop (7th Edition) Price: 12000.00rs BUY NOW', 'Oversized Tshirt for Men Price: 400.00rs BUY NOW', and 'Banarasi Silk Zari Dupatta/Chunni Price: 800.00rs BUY NOW'. The 'UseMart Services' section features a background image of hands typing on a laptop and text encouraging users to turn wrenches or upgrade tech. It includes a 'Start Here' button. Another section allows users to share their interests with the community, with a 'Share Here' button and an image of a person working at a desk.

Process of adding product to Cart and Wishlist

User must be login to perform add to cart and Wishlist actions

This screenshot shows a web browser displaying the UseMart product search page. The URL in the address bar is `localhost/project/product_search.php?query=f`. The page features a green header with the UseMart logo and navigation links for Community, Chat, Wishlist, Cart, and User profile. A central search bar contains the query "f". Below the search bar, a modal window titled "localhost says" displays the message "Please log in to add items to your cart." with an "OK" button. To the left of the modal, there is a sidebar titled "Filter Items" with sections for "Price Range" (input fields for min and max), "Categories" (checkboxes for Electronics, Clothing, Home-Furniture, Sports-Fitness, Vehicle parts, Books, Beauty products, Jewelers, Toys, Tools, and Others), and a "Filter Products" button. The main content area is titled "Search Results for 'f'" and lists two products: "Mamaearth Hydra-Glow" and "COLORESSENCE Glitterati". Each product card includes an image, the product name, price (600.00rs), a brief description, and "BUY NOW" and "ADD TO CART" buttons. The "Mamaearth Hydra-Glow" card also features a "Wishlist" icon.

This screenshot shows a web browser displaying the UseMart product search page, identical to the one above but with a different product listing. The URL in the address bar is `localhost/project/product_search.php?query=f`. The page layout is the same, featuring a green header, a search bar with the query "f", and a modal window prompting the user to log in to add items to their cart. The sidebar on the left contains the "Filter Items" section with "Price Range" and "Categories" (checkboxes for Electronics, Clothing, Home-Furniture, Sports-Fitness, Vehicle parts, Books, Beauty products, Jewelers, Toys, Tools, and Others). The main content area is titled "Search Results for 'f'" and lists the same two products: "Mamaearth Hydra-Glow" and "COLORESSENCE Glitterati". Each product card includes an image, the product name, price (600.00rs), a brief description, and "BUY NOW" and "ADD TO CART" buttons. The "Mamaearth Hydra-Glow" card also features a "Wishlist" icon.

Community post page

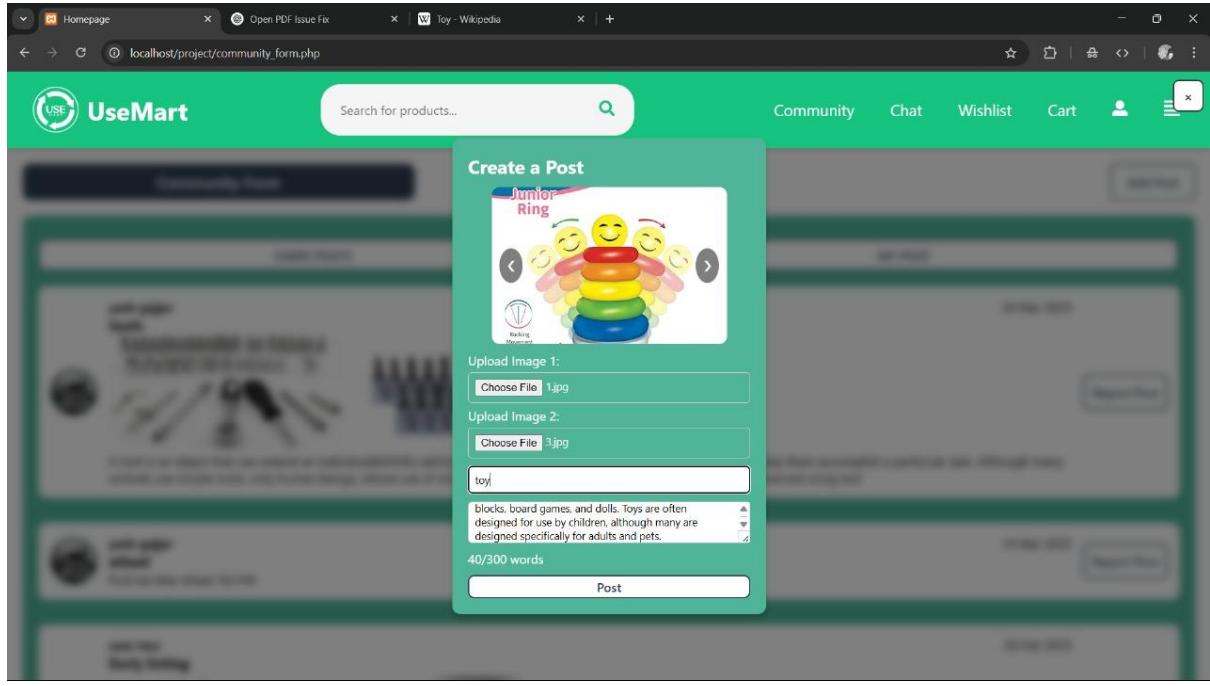

This screenshot shows the 'Community Form' section of the UseMart website. It displays two user posts. The first post, by 'yash gajjar tools', shows a collection of various tools and is dated 20 Mar 2025. The second post, by 'yash gajjar wheel', shows a bike wheel and is dated 14 Mar 2025. Both posts include a 'Report Post' button. A third post by 'user two Early listing' is partially visible at the bottom.

This screenshot shows the 'Community Form' section with a filter applied to show only the user's own posts. It displays one post by 'user two Early listing' featuring a toy and a Ganesh statue, dated 26 Feb 2025. The post includes a 'Delete Post' button. The footer contains links for Social Media, Report, About Us, and Help & Contact.

User can see post made by other users and can view his own post and user can view other user profile by clicking on users pfp

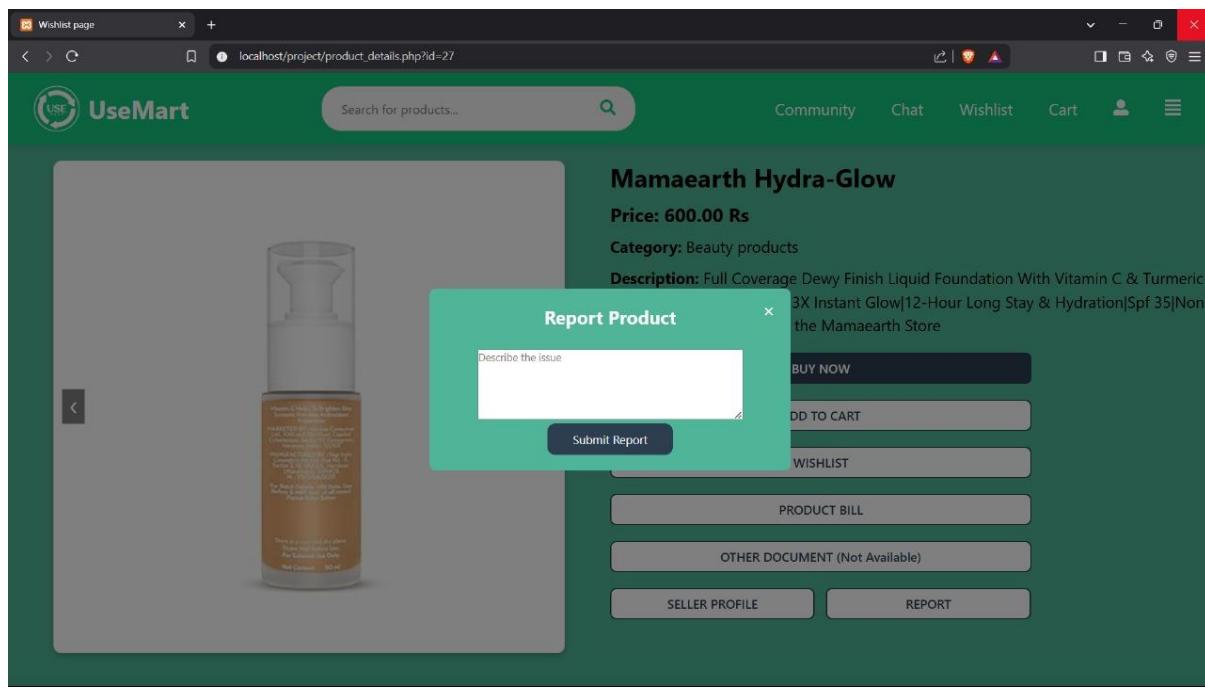

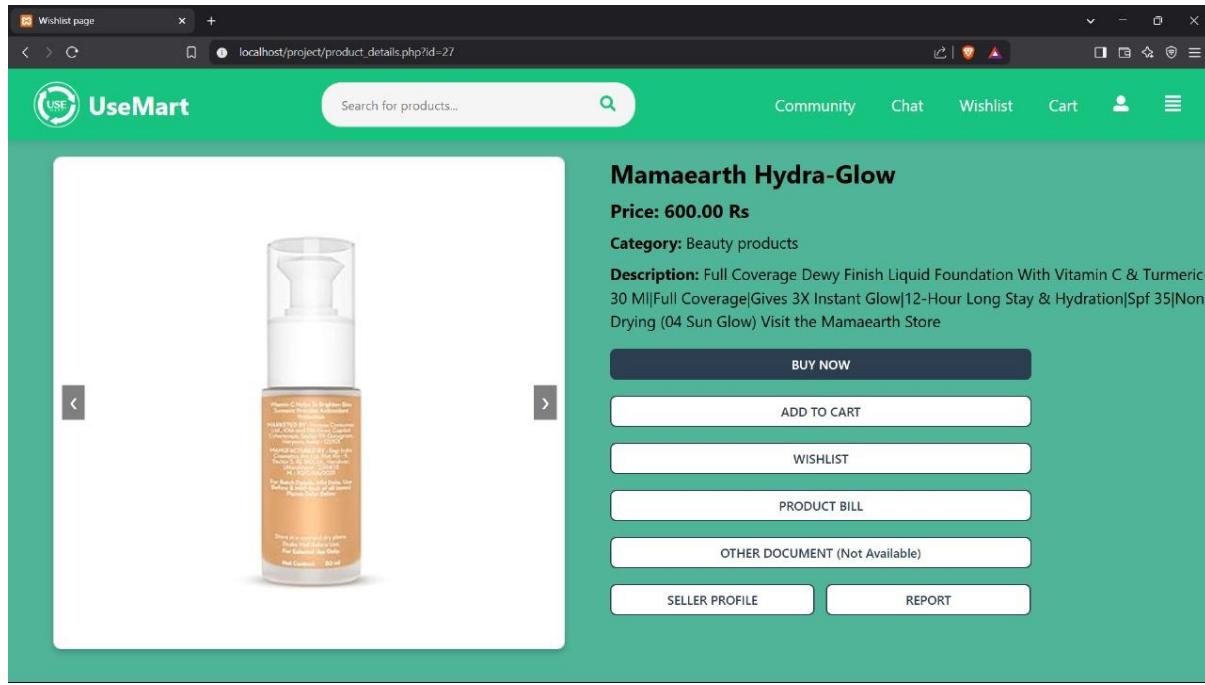

A screenshot of a web browser displaying the UseMart website. The page shows a 'Community Form' section with a 'Report Post' dialog box overlaid. The dialog box has a green header with the title 'Report Post'. It contains a text input field labeled 'Describe the issue' and a 'Submit Report' button at the bottom. In the background, there's a post from 'user two' titled 'Early listing' with a red book thumbnail and some text. The footer of the page includes links for Social Media (Insta, X, Facebook), Report (Buyer/Customer, Seller, Bugs), About Us (Terms & Conditions, Developers, Company Info), and Help & Contact (Seller Info, Contact Us).

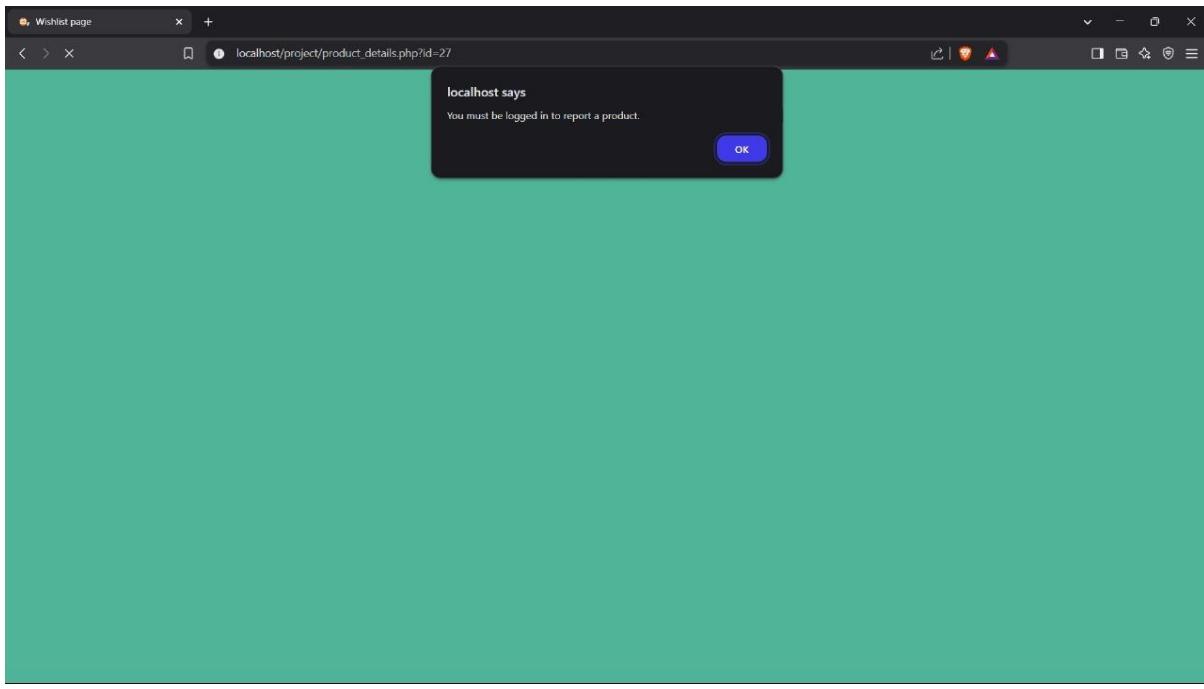

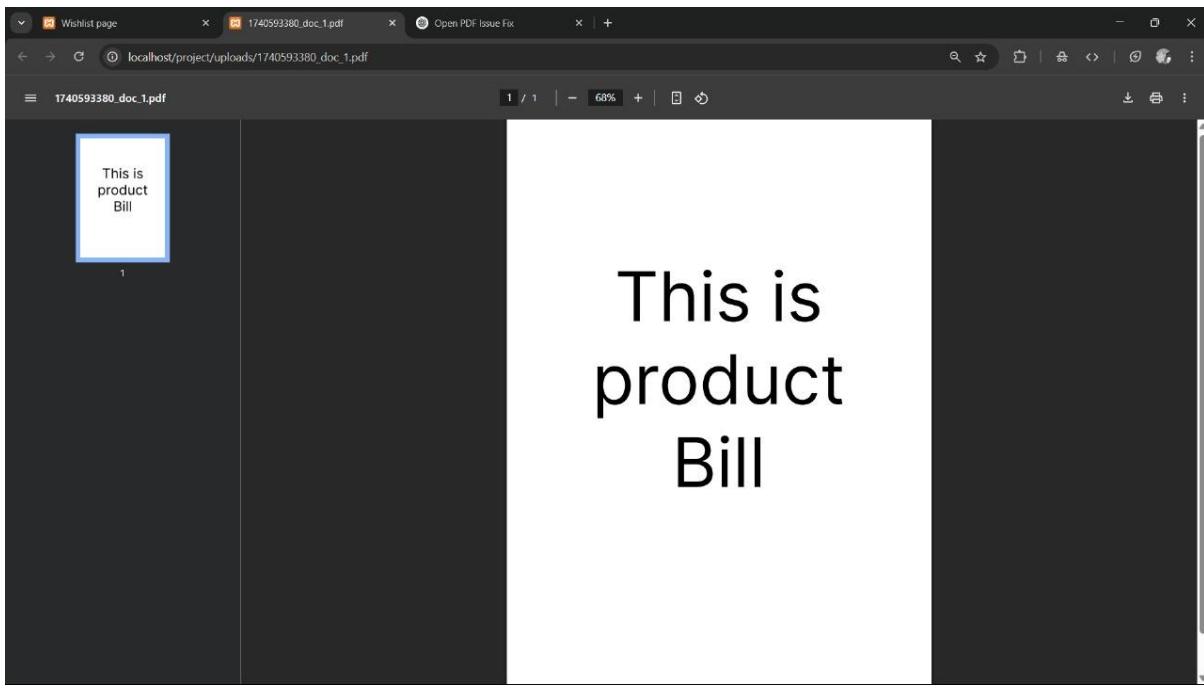

A screenshot of a web browser displaying the UseMart website. The page shows a 'Community Form' section with a 'Create a Post' dialog box overlaid. The dialog box has a green header with the title 'Create a Post'. It contains fields for 'Upload Image 1:' (Choose File - No file chosen), 'Upload Image 2:' (Choose File - No file chosen), 'Enter topic' (a text input field), 'Content (max 300 words):' (a text area with placeholder '0/300 words'), and a 'Post' button at the bottom. In the background, there are blurred posts from other users.

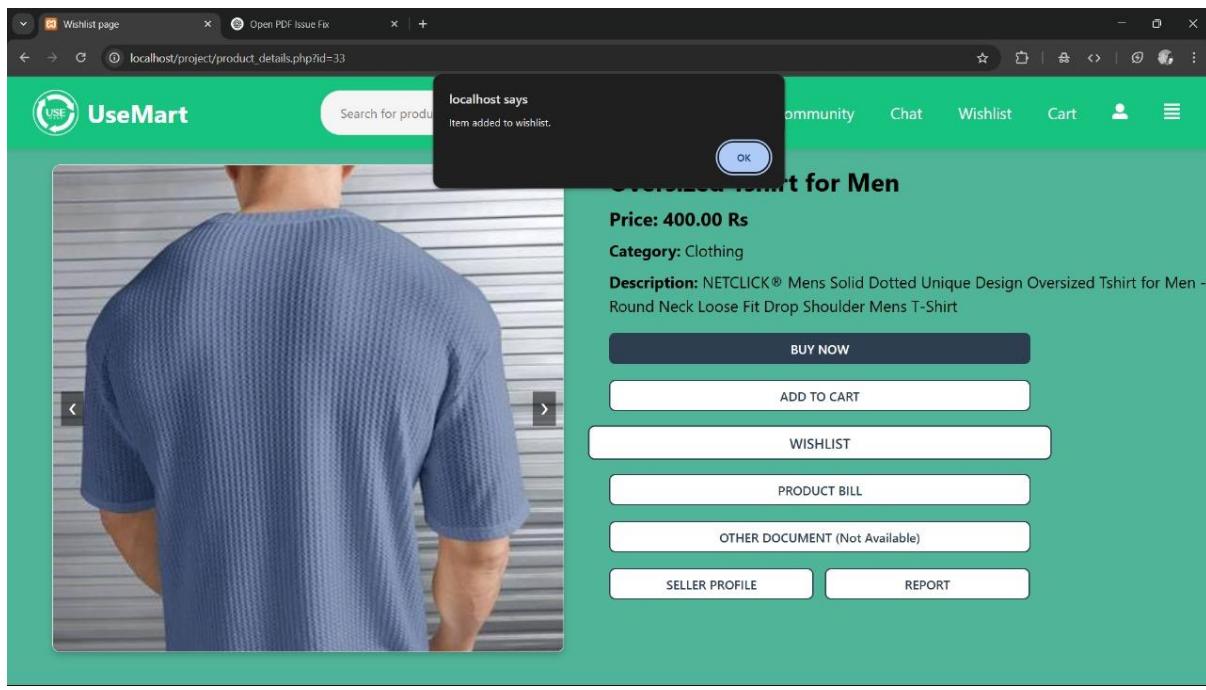

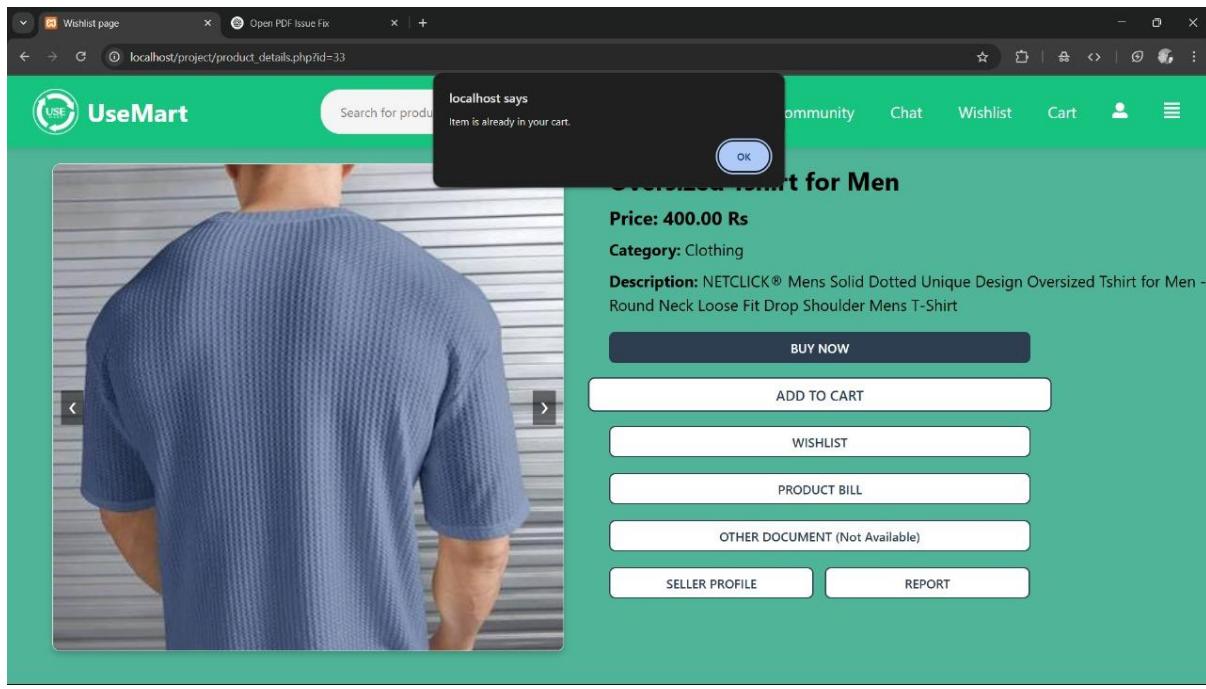

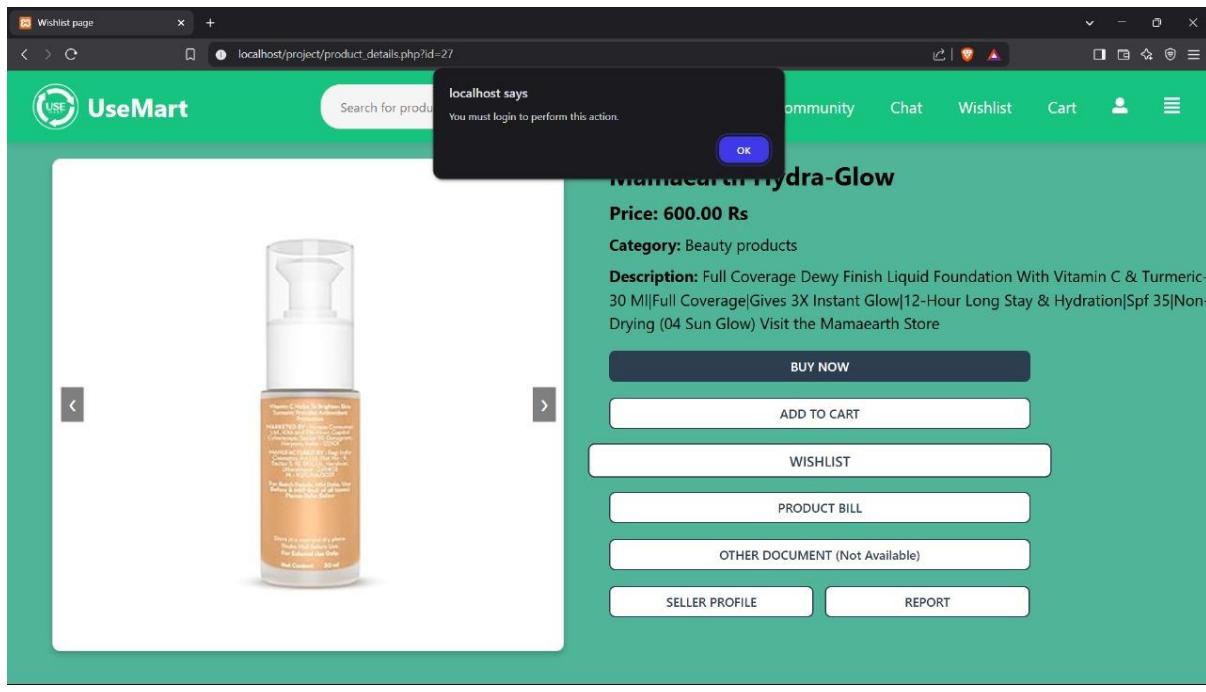

User can add his own post by create post form and report post through report form

Product Page

This is product page where can add product to their cart and wishlist, user can also report if the product has wrong info, fake documents, fake images or other thing that is not right user can view product in slideshow and can view documents in new page. User can not add product to their cart or wishlist if the listed product is their own and view the profile of product seller must be logged in to perform certain actions

17	user three	Valiant Women	1,000.00 Rs	2025-03-20 20:51:34	<button>Download Invoice</button>

The screenshot shows a web browser window with the URL localhost/project/user_details.php. The page is titled "My details". The main content area is titled "Reported Orders" and displays a single report entry:

Report Reason: order **Status:** Pending
Order ID: 15 **Product Name:** Oversized Tshirt for Men **Price:** 400.00 Rs
Tracking Status: Pending
Ordered At: 2025-03-20 20:51:34

There is a "Delete Report" button next to the entry.

Below this is a section titled "Reported Users" which contains one entry:

Report: user report
Status: Pending
Name: Kushal mistry **Bio:** Developer of UseMart

There is a "Delete Report" button next to this entry.

Next is a section titled "Reported Posts" which contains one entry:

Report Reason: demo 1
Status: Pending
Topic: tools
Content: A tool is an object that can extend an individual's ability to modify features of the surrounding environment or help them accomplish a particular task. Although many animals use simple tools, only human beings, whose use of stone tools dates back hundreds of millennia, have been observed using tool

There are "Image 1" and "Image 2" buttons, and a "Delete Report" button.

Finally, there is a section titled "Reported Products" which contains one entry:

Report Reason: product **Status:** Pending
Name of Product: Mamaearth Hydra-Glow
Price: 600.00Rs **Category:** Beauty products
Product Description: Full Coverage Dewy Finish Liquid Foundation With Vitamin C & Turmeric- 30 Ml|Full Coverage|Gives 3X Instant Glow|12-Hour Long Stay & Hydration|Spf 35|Non-Drying (04 Sun Glow) Visit the Mamaearth Store

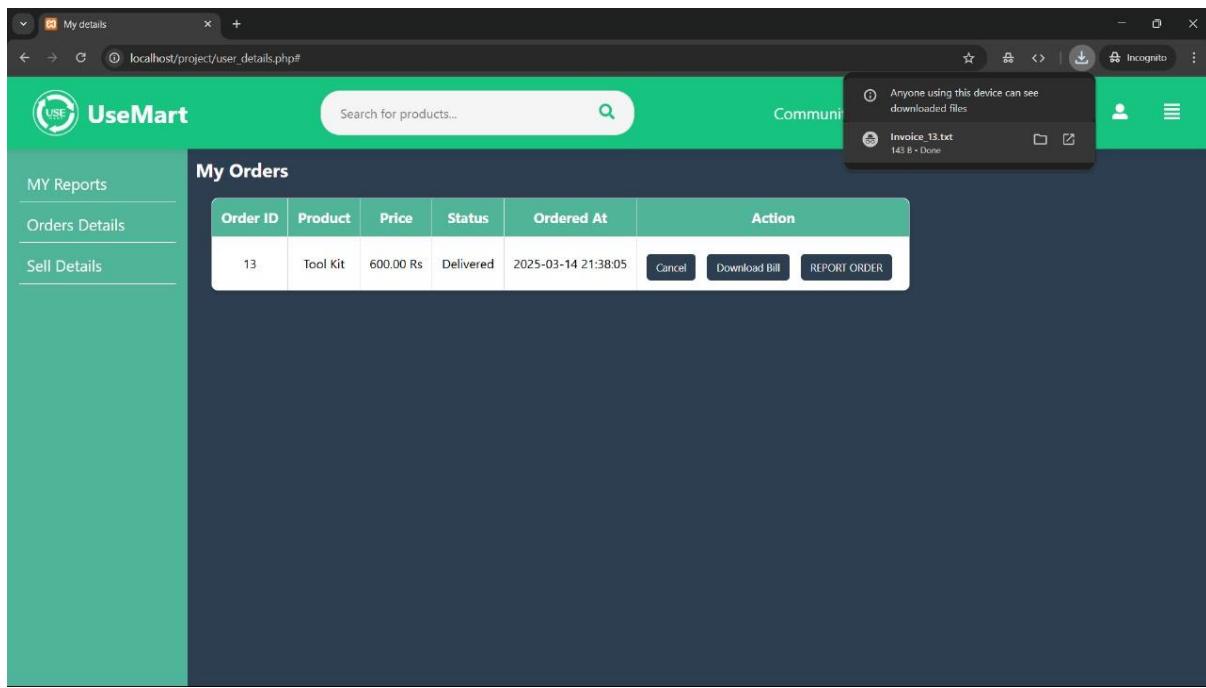

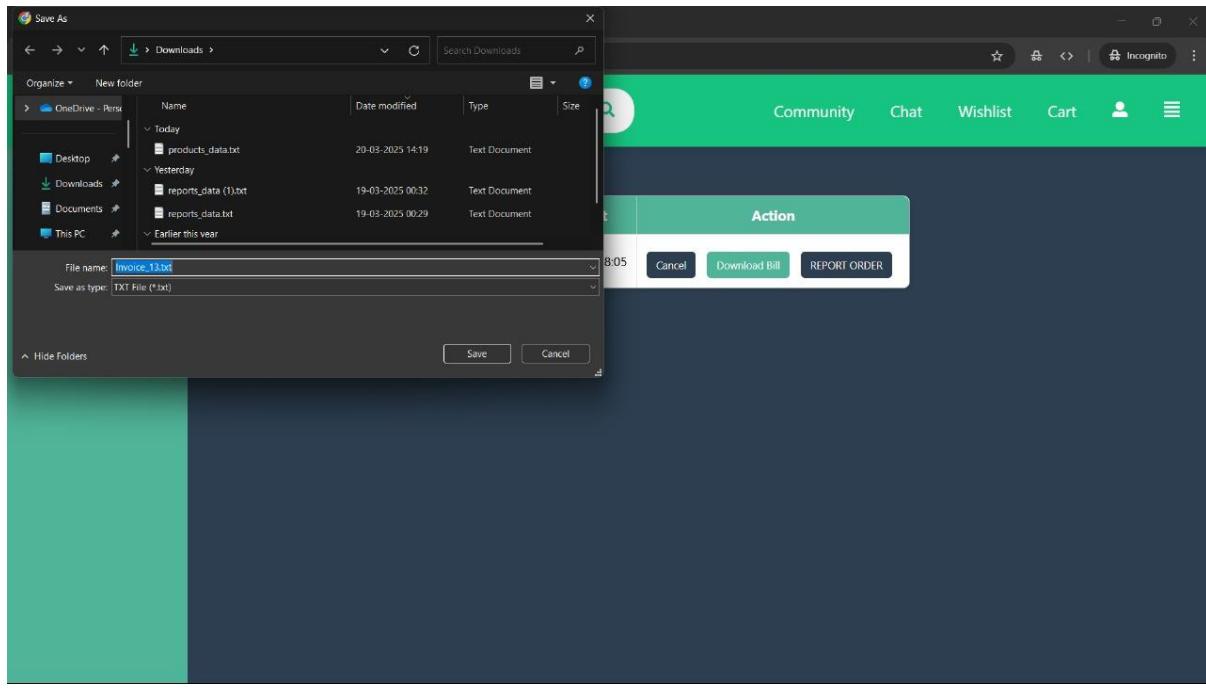

There is a "View Details" button next to this entry.

User can see all reports, sales and order. User can view images and document on new page user can view this/ her order status

The screenshot shows a web browser window for the UseMart platform. The URL is `localhost/project/user_details.php#`. A modal dialog box in the center says "localhost says" followed by "Are you sure you want to delete this report?". Below the modal, there are two buttons: "OK" and "Cancel". The main content area displays four sections: "Reported Orders", "Reported Users", "Reported Posts", and "Reported Products". Each section contains a report card with details like Report Reason, Status, and Product/Post description. A "Delete Report" button is located at the bottom right of each card. The "Reported Orders" section shows a report for an order with ID 15, product name "Oversized Tshirt for Men", price "400.00 Rs", tracking status "Pending", and ordered at "2025-03-20 20:51:34". The "Reported Posts" section shows a report for a post with reason "demo 1", status "Pending", topic "tools", and content about tools. The "Reported Products" section shows a report for a product with name "Mamaearth Hydra-Glow", price "600.00rs", category "Beauty products", and description "Full Coverage Dewy Finish Liquid Foundation With Vitamin C & Turmeric- 30 ML|Full Coverage|Gives 3X Instant Glow|12-Hour Long Stay & Hydration|Spf 35|Non-Drying (04 Sun Glow) Visit the Mamaearth Store".

This screenshot shows the same UseMart platform interface after a report has been deleted. The modal dialog now says "Report deleted successfully!" and has a single "OK" button. The main content area remains the same as in the previous screenshot, displaying the "Reported Orders", "Reported Users", "Reported Posts", and "Reported Products" sections with their respective report cards and "Delete Report" buttons.

Conclusion

- Thus we conclude that we enjoyed very much working on the project “**Second hand goods and market place(Use Mart)**” our internal guide Prof.
- **Prof.Ruchika rami** helped us a lot in improving the quality of our project.
- As well as our external guide **Mr. Mihir Panchal** helped us a lot in giving suggestions for better functioning of our work.
- This is just the stepping stone for project development there is new paths to be discovered and there are new goals that are to be achieved
